Hello [XYZ],

I still remember, it was November 6 when I took the decision to make more people financially aware.

I started working towards my goal of being financially free during the month of November on 2014. To let you know I was a researcher in Laser Optics and I don't want to bore you with any of its specifics. But interested can always send me an email.

You may ask ,how a researcher in Science is talking about personal finance, cash flow and stocks and all. Your question is legit. Let me take you back five years ago.

I was just a guy in the early 20s, stressed out, depressed and broke. I was trying to figure out life. I was tired of thinking about my career and my family. I was not in a desirable situation mentally and financially, although no one could tell that just by looking at my face. It affected me psychologically, I developed speech issues, low self-esteem and depression was my long companion.

About this time I came across one personality(For some reasons I can't disclose him) who changed my view towards accumulating wealth.

'Financial independence is all about creating how you are thinking to achieve your goals towards it. The first question should be, Why do you want to be financially independent? The second would be ' How would you like to take your journey ahead? Anyways you will be dead in 50 years if I take the average lifespan. So whatever you want to do you should put your soul into that.

Making more money is just a Science that anyone can choose to learn. But you need to be resilient and determined. This digital era is bringing us more opportunities. You need to learn how to use that to your advantage'

You can read more about him in my [book here.](#)

This is just an excerpt regarding what he has said to me. Right after that interaction I started hustling like never before. I started reading more, built network , started side hustles, failed more and more. But after every failure I learnt. I tried to avoid making the same mistake again and again. Gradually I was working towards my goal and the day arrived when I reached the goal of financial independence.

I can't include all my journey in this single newsletter. But you may check out my [book](#) where I talked about my journey from 10 dollars to 1.5 mil dollars.

And yeah it was November 6 when I decided to take my journey forward as I wanted to help more people who are stuck like I was before.

You may register to our coaching and mentoring program [here](#).

Here you will able to learn about various secrets that took me where I am today.

Today I can be in any place of the world and do my work. I can spend as much time with my family and take them to a vacation to anywhere possible.

But you don't need to wait 6 years like me to be financially sound. Learn from my mistakes and apply the proven techniques and procedures that helped me achieve my financial freedom. Learn what is going to work in the present world that can make you invincible.

I have walked my journey and now it time to walk yours. And I may be someone who can make it far easier.

Cheers

Sincerely,

MARK Jonas
